

Managing Requirements and Developing Large LabVIEW Applications

Publish Date: Jun 3, 2008 | 0 Ratings | **0.00** out of 5 | Submit your Review (http://sine.ni.com/apps/utf8/nidz_display_comments.create_comment?p_title=Managing+Requirements+and+Developing+Large+LabVIEW+Applications&p_doc_id=VV-313-EN&p_doc_type=vv&p_url=http://www.ni.com/webcast/313/en/&p_doc_url_id=313)

Overview

A first step in developing any large application is capturing the requirements, before any serious development begins. Developers use many different approaches for capturing or documenting requirements, from text files or Microsoft Word documents to using dedicated requirements management tools such as Telelogic DOORS or IBM Rational Requisite Pro. The key to managing requirements is to have them documented clearly, and then to associate them with the code that has been implemented to cover them. Done correctly this association will streamline your development by giving you the means to trace your requirements to the components that cover them. Attend this webcast to take a closer look at requirements management and a way to link your requirements with particular LabVIEW VIs, giving you traceability from documentation to implementation.
